Work Experience

Software Developer at Klobot Inc, January 2020 – January 2022 New York, NY

- Developed persona driven reusable charting and table components for a client's SharePoint Online Intranet and debugged issues client faced with existing components
- Built RESTful APIs and frontend functionality for a web app that provides the ability to view, edit, search, and sync iManage Work Server 10.2+ and iManage Cloud content with Microsoft Teams, Microsoft SharePoint, or other web apps
- Worked on a team of five developers to build an Angular and OpenCart based e-commerce website for a client with 200+ business customers
- Built a POC Azure function app for client to automate the process of creating deals in Microsoft SharePoint from deals that were already created in DealCloud
- Developed firm directory web app for client's Microsoft SharePoint tenant that allowed users to filter and search for the profiles of other users using React, SPFx, Azure Active Directory, and Microsoft Graph API

Software Developer Intern at KLST Inc, October 2019 – December 2019 New York, NY

- Using React, SPFx and Microsoft Graph API, collaborated with another developer to build a client web app used to create, delete, and manage over 2000 deals of a leading private equity firm
- Performed research on Microsoft Graph API and built sample POC web app with ASP. Net MVC to showcase its capabilities which were used later in internal and client projects
